## **DETAILED ACTION**

### ***Preliminary Amendments***

1. The preliminary amendments filed on August 23, 2004 have been entered. The claims pending in this application 21-33.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 21-23, drawn to a method for the study of inter-molecular interactions under physiological or near-physiological conditions.

Group II, claims 24 and 31-33, drawn to drug candidates (claims 24 and 33) and drug delivery vectors (claims 31 and 32).

Group III, claim 25-28, drawn to a method for the production of a biomolecular complex.

Group IV, claims 29 and 30, drawn to a combinatorial library.

3. The inventions listed as Groups I to V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I, III, and IV and Group II do not relate to a single general inventive concept under PCT Rule 13.1 because the technical feature linking Groups I, III, and IV and Group II is

Art Unit: 1634

not special. For example, the drug candidates in claim 24 of Group II is not contribution over the prior art (see column 14, lines 50-67 and column 15, lines 1-7 of US Patent No. 6,420,532 B1).

Although the drug candidates taught by US Patent No. 6,420,532 B1 is not made by a process of claim 21 of Group I, since claim 24 of Group II is a product-by-process claim, it is well established that even though product-by process claims are limited by and defined by the process, the determination of the patentability of the product is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.

Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because they lack the same or corresponding special technical features. For example, the study of inter-molecular interactions under physiological or near-physiological conditions in claim 21 of Group I is not required for Group III while the production of a biomolecular complex recited in claim 25 of Group III is not required for Group I.

Groups I and IV do not relate to a single general inventive concept under PCT Rule 13.1 because they lack the same or corresponding special technical features. For example, the study of inter-molecular interactions under physiological or near-physiological conditions in claim 21 of Group I is not required for Group IV while a combinatorial library recited in claim 29 of Group IV is not required for Group I.

Groups III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because they lack the same or corresponding special technical features. For example, the

Art Unit: 1634

the production of a biomolecular complex recited in claim 25 of Group III is not required for Group IV while a combinatorial library recited in claim 29 of Group IV is not required for Group III.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CAR § 1.6(d)).
